MS_Help()
{
    cat << EOH >&2
${helpheader}Makeself version 2.4.5
 1) Getting help or info about $0 :
  $0 --help   Print this message
  $0 --info   Print embedded info : title, default target directory,
embedded script ...
  $0 --lsm    Print embedded lsm entry (or no LSM)
  $0 --list   Print the list of files in the archive
  $0 --check  Checks integrity of the archive
  $0 --verify-sig key Verify signature agains a provided key id

 2) Running $0 :
  $0 [options] [--] [additional arguments to embedded script]
  with following options (in that order)
  --confirm             Ask before running embedded script
  --quiet               Do not print anything except error messages
  --accept              Accept the license
  --noexec              Do not run embedded script (implies --
noexec-cleanup)
  --noexec-cleanup      Do not run embedded cleanup script
  --keep                Do not erase target directory after running
                        the embedded script
  --noprogress          Do not show the progress during the
decompression
  --nox11               Do not spawn an xterm
  --nochown             Do not give the target folder to the current
user
  --chown               Give the target folder to the current user
recursively
  --nodiskspace         Do not check for available disk space
  --target dir          Extract directly to a target directory
(absolute or relative)
                        This directory may undergo recursive chown
(see --nochown).
  --tar arg1 [arg2 ...] Access the contents of the archive through
the tar command
  --ssl-pass-src src    Use the given src as the source of password
to decrypt the data
                        using OpenSSL. See "PASS PHRASE ARGUMENTS"
in man openssl.
                        Default is to prompt the user to enter
decryption password
                        on the current terminal.
  --cleanup-args args   Arguments to the cleanup script. Wrap in
quotes to provide
                        multiple arguments.
  --                    Following arguments will be passed to the
embedded script
